

Intelliwave's SiteSense® Mobile Materials Management now on SAP® Store

May 28, 2024

Intelliwave Technologies has announced the availability of its SiteSense® Mobile Materials Management solution on SAP® Store, the online marketplace for SAP and partner offerings.

SiteSense® seamlessly integrates with SAP S/4HANA, synchronizing purchase orders, receipts, transfers, adjustments, and issue tickets for materials, inventory, and warehouse management. This enables field crews to directly complete these transactions on mobile devices using RFID, BLE, and GPS technologies, resulting in ten times faster material location.

"Construction projects dedicate roughly 40% of their budget to materials," said Dale Beard, President and Co-Founder of Intelliwave. "By integrating SiteSense® with SAP S/4HANA data, we bridge the gap between procurement and planning teams and on-site inventory management personnel. This eliminates information silos and automates tasks, streamlining material, tool, equipment, and asset management – all of which translates to reduced time and resource needs on the jobsite."

Key Benefits for Construction Customers

The integration of SAP S/4HANA and SiteSense® offers a range of benefits for construction companies:

- **Reduced Material Waste:** Eliminate unnecessary re-ordering and re-purchasing, potentially cutting supply costs by 40%.
- **Improved Cash Flow:** Close the payment loop from the field, leading to potential cash flow savings of 23%.

- **Enhanced Worker Productivity:** Faster material location with SiteSense® can boost craft labor productivity by up to 16%.

SiteSense® caters to four key areas in construction project management:

- Materials and Inventory Management
- Track and Trace
- Materials and Equipment Planning
- Tools, Assets, and Equipment Management

SAP Store (store.sap.com) offers a streamlined and connected digital experience for customers seeking, trialing, purchasing, and renewing software solutions. It provides access to over 2,300 solutions from SAP and its partners, including validated solutions like SiteSense® that support business growth. Additionally, with every purchase made through SAP Store, a tree is planted by SAP.

Intelliwave Technologies is a proud member of the SAP PartnerEdge® program. This program equips partners with the tools, benefits, and support needed to develop high-quality, innovative applications that address specific business needs – quickly and cost-effectively.
