

Galorath to Showcase Innovative Cost Estimation and AI Technology at AIMST 2024

August 6, 2024

Galorath, a provider of digital engineering solutions and consulting services for project estimation, planning, and should-cost analysis, has announced it will be speaking and exhibiting at the [AI Manufacturing & SCADA Technology Conference & Exhibition \(AIMST\)](#) in Pittsburgh, Pennsylvania from August 13-15 in booth #100. An industry-leading conference for manufacturing, AIMST brings together industry experts and professionals to explore the latest advancements in AI and SCADA technology.

“We are excited to discuss the transformative impact of SEERai on manufacturing projects and cost estimation,” said Dan Galorath, founder and chief executive officer, Galorath Incorporated. “With SEERai, organizations of all sizes and markets can leverage the power of natural language to decrease time to market and increase profitability.”

During the event, Galorath will showcase its cutting-edge generative artificial intelligence, SEERai, designed to revolutionize manufacturing production, project management, and revenue optimization. Galorath’s speaking session and exhibition will include:

- **“Revolutionizing Manufacturing with Generative AI” - Aug. 14 at 10:45 a.m. ET:** As part of the AI Manufacturing track at AIMST, Dan Kennedy, senior tech fellow, engineering services, Galorath will explore the transformative impact of generative AI on advanced manufacturing, driving efficiency, innovation, and sustainability. The session will uncover how AI-driven solutions are redefining cost estimation, project planning, and risk management across diverse industries and will highlight the cross-industry role AI plays in leveraging historical data while dramatically improving planning and cost estimations.

Attendees will discover how companies can use AI to forecast costs for new products while optimizing budgets and resources, how contractors can leverage AI to streamline project timelines and ensure timely delivery, and how organizations of all sizes can mitigate risk, reduce time-to-market, and enhance compliance.

- **Live Demonstration of SEERai:** Attendees will experience a live demonstration of Galorath’s groundbreaking generative AI solution, [SEERai](#), showcasing its capabilities to deliver unmatched insights and reliability for project estimation and should-cost analysis.

Designed to revolutionize manufacturing production, project management, and revenue optimization, SEERai is an advanced generative AI that provides C-level executives, digital engineers, and project estimation professionals in manufacturing with the data-driven insights needed for accurate and timely project planning and risk analysis. SEERai equips leaders, engineers, and finance professionals with the tools required to manage the complexities of modern projects, enabling them to deliver on time, within budget, and with optimal resource utilization.
