

# Jacobs Extends DC Streetcar Program Management Contract, Highlighting Urban Mobility Expertise

August 20, 2024

**Jacobs has announced a two-year extension to its program management contract for the District Department of Transportation's (DDOT) DC Streetcar project.**

This extension recognizes Jacobs' successful performance in supporting the electric streetcar system since its launch five years ago. The 2.4-mile route connects communities, offering a convenient and environmentally friendly transportation option.

"Reviving the streetcar in Washington, D.C. is not only a nod to the city's historic roots when streetcars were a vital transport option, but also a promise to its bright future," said Jacobs Senior Vice President [Chrissy Thom](#).

"Working as the District Department of Transportation's Program Management Consultant for over five years, we've enhanced mobility and connectivity, providing more opportunities for employment and attracting new business along the corridor. Our experience on [similar global programs](#) provides DDOT with a trusted advisor to keep the DC Streetcar moving into its next chapter."

Under the extended contract, Jacobs' role expands to include:

- Overseeing and managing operations and maintenance activities
- Providing on-site engineering services

- Developing safety and security plans
- Managing external communications

Jacobs' experience on similar global programs positions them as a trusted advisor for DDOT.

### **Building on a Legacy of Urban Transformation**

With a ranking of No. 1 in Program Management by Engineering News-Record, Jacobs boasts a proven track record of delivering complex urban infrastructure projects.

Some examples include:

- **Expo 2020 Dubai:** Transforming over 1,000 acres into a lasting urban legacy.
- **Thames Tideway Tunnel:** Cleaning up the River Thames and improving London's water quality.
- **National Western Center Redevelopment:** Creating a sustainable, year-round destination in Denver.
