

# Plan Group selects SIS Construct 365 for Digital Transformation Move to Dynamics 365

August 6, 2024

**SIS LLC, a leading provider of cloud-based ERP and CRM solutions built on Microsoft Dynamics 365 for construction and project-based companies, has announced that Plan Group, a premier technical solutions contractor in Canada, has selected SIS Construct 365 to support its digital transformation journey.**

Plan Group will leverage SIS Construct 365 Project Cost Management (PCM) as the core of its construction operations. This move from SAP to Dynamics 365, facilitated by SIS alongside Microsoft Consulting Services, will enhance integration and efficiency across the organization.

“SIS appreciates Plan Group’s confidence in us to select SIS Construct 365 PCM as the solution to fully support their construction operations. This move will improve integration and efficiency across the organization. We look forward to a successful implementation partnership with Plan Group,” Mark Kershteyn, SIS Partner.

## **Plan Group: A Legacy of Technical Expertise**

Founded in 1955 as a family-run electrical business, Plan Group has evolved into Canada’s leading technical solutions contractor. Today, the company specializes in delivering large-scale and mid-market Electrical, Mechanical, and Technology construction projects, along with ongoing service and facilities management across diverse industries.

## **A Cloud-Based Solution for Enhanced Efficiency**

SIS Construct 365, a cloud-based solution built on Microsoft Dynamics 365, will provide Plan Group with a centralized platform for managing project costs, streamlining workflows, and optimizing resource allocation. This digital transformation initiative will empower Plan Group to:

- Gain real-time insights into project performance
- Improve collaboration across teams
- Enhance financial control and reporting
- Increase operational efficiency

By leveraging SIS's expertise in Dynamics 365 and construction-specific functionalities, Plan Group is well-positioned to achieve its digital transformation goals and propel its business forward.
