Accenture and NVIDIA Partner to Accelerate Enterprise AI Adoption

October 4, 2024

Accenture and NVIDIA today announced a strategic partnership to help businesses rapidly scale their AI adoption. The partnership includes the formation of a new Accenture NVIDIA Business Group and a significant investment in training over 30,000 professionals globally.

The new business group will focus on helping clients leverage generative AI to reinvent processes and scale enterprise AI adoption. Accenture's AI Refinery platform, powered by NVIDIA's AI stack, will enable companies to jump-start their custom agentic AI journeys.

"We are breaking significant new ground with our partnership with NVIDIA and enabling our clients to be at the forefront of using generative AI as a catalyst for reinvention," said Julie Sweet, Chair and CEO, Accenture. "Accenture AI Refinery will create opportunities for companies to reimagine their processes and operations, discover new ways of working, and scale AI solutions across the enterprise to help drive continuous change and create value."

"AI will supercharge enterprises to scale innovation at greater speed," said Jensen Huang, founder and CEO, NVIDIA. "NVIDIA's platform, Accenture's AI Refinery and our combined expertise will help businesses and nations accelerate this transformation to drive unprecedented productivity and growth."

The Accenture NVIDIA Business Group will focus on accelerating momentum with generative AI and helping clients scale agentic AI systems. Agentic AI systems represent a leap forward for generative AI, enabling autonomous decision-making and process reinvention.

Accenture and NVIDIA are already working with clients to adopt and scale agentic AI systems. For

example, Indosat Group is building industry-specific AI solutions on top of its data center, powered by NVIDIA AI software and accelerated computing. Accenture is also developing a new NVIDIA NIM Agent Blueprint for virtual facility robot fleet simulation, which integrates NVIDIA Omniverse, Isaac, and Metropolis software.

By combining Accenture's industry expertise with NVIDIA's AI technology, the partnership aims to empower businesses to unlock the full potential of AI and drive innovation.
