

UK Embassy in Lima Seeks Proposals for Citizen Dialogue Project to Strengthen Democracy and Sustainable Development in Peru

October 9, 2024

The British Embassy in Lima is seeking proposals for a project that will bring together diverse voices from Peruvian civil society to discuss challenges to democratic governance and sustainable development.

The project aims to foster consensus-building among local actors and stakeholders, develop a citizen-driven public agenda, and increase public trust in government and the electoral process. The project should adopt a decentralized approach, prioritizing local voices outside of Lima. It should also include inclusive dialogue with civil society, academia, public organizations, and youth groups.

Successful bidders will be expected to create a space for dialogue, collate and systematize the shared agenda, and disseminate findings through multimedia communication products. The project should involve a wide range of stakeholders from all sectors, including private, public, academia, local organizations, NGOs, unions, and political leaders.

Projects should propose a clear methodology and activities to achieve their objectives within the project duration and ensure sustainability beyond the project's end. The project budget should not exceed £17,000.

This project aligns with the UK's commitment to strong democracies and public participation. By

supporting a citizen-driven agenda, the project aims to strengthen democratic governance and sustainable development in Peru.

Completed forms should be sent in standard document and spreadsheet formats in English or Spanish to BEProjectsPeru@fcdo.gov.uk by 11:59pm October 20th, with “Call for bids Citizen Dialogue” in the subject line of your email.
