

# Anticipate London: A New Era for Property, Safety, and Security Professionals

November 26, 2024

**Anticipate London** is set to revolutionize the way industry professionals approach the challenges and opportunities facing the property, safety, and security sectors. This innovative event brings together the renowned Facilities Show, Safety & Health Expo, FIREX, and IFSEC under one roof, offering a comprehensive platform for knowledge sharing, networking, and sourcing cutting-edge solutions.

In today's rapidly changing world, property and people leaders must navigate a complex landscape of evolving regulations, technological advancements, and emerging threats. Anticipate London addresses these challenges head-on, providing valuable insights and practical solutions to help professionals stay ahead of the curve.

## Key highlights of Anticipate London include:

- **Comprehensive Content:** A diverse range of expert-led sessions covering topics such as ESG, workplace trends, PropTech, employee well-being, fire safety, cybersecurity, and more.
- **Networking Opportunities:** Exclusive networking events and VIP lounges provide opportunities for industry leaders to connect, collaborate, and share best practices.
- **Cutting-Edge Technology:** A dedicated showcase of the latest technologies and innovations, including energy monitoring systems, surveillance solutions, and access control systems.
- **Industry Awards:** Prestigious awards ceremonies recognizing excellence in the fields of facilities management, health and safety, fire safety, and security.

Chris Edwards, Group Director, stated, “Anticipate London isn’t just a new event; it’s a smarter, more connected experience designed for the people shaping the future. We’re bringing together the best of these four established events to create a powerful platform for learning, networking, and business growth.”

By uniting these four renowned events, Anticipate London offers a unique opportunity for professionals to gain valuable insights, explore innovative solutions, and connect with industry peers.
