

Mocean Energy Launches Crowdfunding Campaign to Accelerate Ocean Energy Innovation

November 22, 2024

Mocean Energy, a pioneering force in ocean energy technology, has launched a crowdfunding campaign on Crowdcube to accelerate its growth and commercialization efforts.

The company's innovative wave and solar-powered technology, Blue X, offers a reliable and sustainable solution for generating clean energy. By harnessing the power of the ocean, Mocean Energy aims to contribute to a greener future and address the global energy challenge.

The funds raised through the crowdfunding campaign will be used to further develop and commercialize the Blue X technology. This will involve scaling up production, optimizing performance, and expanding into new markets.

"We are advancing our innovative technology in support of our ambition to become a global leader in the ocean energy space. This crowdfunding round is an opportunity to join us on this exciting journey as we deliver cutting-edge solutions to power a cleaner, greener future," said Cameron McNatt, Managing Director at Mocean Energy.

Mocean Energy has already made significant strides in the development of its technology, with successful deployments of the Blue X prototype and ongoing commercial projects. The company's strong track record and experienced team position it as a leading player in the ocean energy sector.
