

# US Firm Proposes ‘American City’ Project Near Noida International Airport

November 4, 2024

**The Yamuna Expressway Industrial Development Authority (YEIDA) has received a proposal from Blue Sky Vantage, a US-based consultancy firm, to develop an “American City” near the upcoming Noida International Airport in Jewar.**

The proposed project spans 1,200 acres across four sectors and will include campuses of American educational institutions, along with business, commercial, and institutional facilities such as hospitals and schools. The US firm plans to invest \$4 billion over the next six years to bring this ambitious project to life.

The strategic location of the proposed “American City” near the Noida International Airport and along the Yamuna Expressway offers excellent connectivity and accessibility. This, coupled with the growing demand for quality education and healthcare facilities, makes the region an attractive destination for such a development.

YEIDA CEO Arun Vir Singh [stated](#) that the proposal has received in-principle approval, and officials have been instructed to allocate 1,200 acres of land for the project.

“The U.S.-based company requested 1,200 acres to establish an international-standard educational institute with facilities for performing arts and cultural programs. Several top U.S. universities will partner in this venture,” Singh said.

This development comes on the heels of similar proposals for a Korean City and a Japanese City in the region, further highlighting the increasing global interest in the Noida region.
