

Climatic by WindowMaster Secures New Project in Copenhagen, Demonstrating Continued Growth

January 15, 2025

Climatic by WindowMaster today announced the securing of a new contract for the installation of rooftop machines at an office building in the heart of Copenhagen. The project will involve the installation of two A10 HT SL LF Atechbc gondola lifts, ensuring safe and efficient access for building maintenance and façade servicing. This project aligns perfectly with WindowMaster’s strategic focus on providing innovative and reliable building access solutions.

WindowMaster is a leading provider of innovative building access solutions, offering a wide range of products and services to customers worldwide.

“This new contract in Copenhagen further solidifies our position in the market and demonstrates our commitment to delivering high-quality solutions to our customers,” said [Name and Title of relevant executive at WindowMaster]. “We are proud to be contributing to the safety and efficiency of building maintenance in this dynamic city.”

The project is expected to be completed in 2025 and will contribute to WindowMaster’s ongoing growth and success.
