

Atlantic Blue Joint Venture to Construct Brunei's Largest Solar Power Plant

June 17, 2025

Atlantic Blue Sdn. Bhd., a wholly-owned subsidiary of Malaysian solar energy specialist **Solarvest Holdings Berhad**, is set to develop Brunei Darussalam's largest national solar project. This significant undertaking will be executed through a joint venture, **Seri Suria Power Sdn. Bhd.**, formed in collaboration with local partners **Serikandi Oilfield Services Sdn. Bhd.** and **Khazanah Satu Sdn. Bhd.**

The planned 30MW (megawatt) photovoltaic (PV) power plant is slated to break ground in the third quarter of 2025. It will be constructed on a 332,900-square-meter former landfill site in Kampong Belimbing, Mukim Kota Batu, Brunei. The project is anticipated to achieve operational status by the close of 2026, marking a pivotal moment in Brunei's renewable energy landscape as the nation's largest PV installation to date.

This collaborative effort underscores a strong commitment to sustainable energy development in Southeast Asia and highlights the growing regional focus on utility-scale solar power generation
